

# Translations:Biodiesel/102/en

---

- It is simple to make yourself.
- It can be produced at a low cost
- It can be used in any conventional diesel engine. It also allows for better lubrication of the engine.
- It contributes to the recycling of organic waste, such as used cooking oil that is widely used in restaurants.
- It is made from vegetable oil and therefore releases only a small additional amount of CO<sub>2</sub> into the atmosphere. It also reduces the emissions of certain harmful compounds compared to petro-diesel (carbon monoxide, sulphur dioxide, etc)
