

Translations:Biodiesel/41/en

Unlike biodiesel, you will need to modify your engine so you can use SVO. The best way to get one is to purchase a professional single-tank SVO system with optimized injector nozzles, glow-plugs for vegetable oil as well as a fuel pre-heating system. With this system Elsbett system, you can use petro-diesel, biodiesel or SVO, with any combination you like. Start up and go, turn off and stop, just like any other car.
