

# Translations:Chauffage solaire version ardoise/75/en

---

**Note:** Here, the chosen ventilation flap is 100mm in diameter, so it is at this diameter that the inlet and the outlet will be made.

- On the central axis of the sensor, trace and cut the air inlet hole, 30mm from the batten, at the bottom of the frame.
- On the central axis of the sensor, trace and cut the air outlet hole, 30mm from the batten, at the top of the frame.
