

# Translations:Cuisinière améliorée - Modèle Patsari/28/en

---

- Mix 2 buckets of commercial grade sand + 1.5 buckets of soil (sifted finely)
- Stir well until mixture is a uniform color.
- Add 3-4 scoops of mortar.
- Add 5-10 liters of water, pouring little by little into the mixture. It is recommended to stir the mixture, so that it is evenly moist, until it reaches a sticky consistency. To see if the mixture has the right amount of moisture, take a handful and see if it runs off your hand; if not, it is ready to use.
