

Translations:Culture de pleurotes/105/en

- Sterilize the Petri dishes (with 70% ethanol and/or under UV) or glass jars (boil them for 15-20min.)
- Cut out pieces of cardboard 3 cm side.
- Sterilize the pieces of cardboard by soaking them in boiling water for example.

 If you have one available, you can use a microwave to sterilize your jars and cartons. Moisten the cartons well, without soaking them before placing them in the microwave.
