

# Translations: Douche à recyclage/28/en

---

- During the washing phase, with soap, use the shower on the classic way, 3-way valve on sanitary hot water
- When passing on *relax* mode:
  - Close the bunghole of the tank
  - Put the mixer to the maximum on hot, only if you have been able to adjust the temperature of the water-heater (Otherwise, beware of burns!)
  - The pump and the water heater are automatically switched on, allowing you to stay under the hot water for the desired time.
