

# Translations:L'énergie dans l'habitat/5/en

---

Within the home, in 2013, 67% of consumed energy went toward heating the home, 10.4% toward heating water, and 6% toward cooking. The remaining 16.6% was used for lighting, household appliances, office equipment, and hi-fi, all of which is grouped under the term “specific energy”. The 16,000 kWh consumed by each household costs just over €1,700 per year.
