

Translations:Le Tuto des Tutos/3/en

A low-tech can be an outcome from traditional or modern know-hows. It finds its utility in towns, just as well as in the countryside. It can make part of rich and industrialized environments, or in developing countries.

We advise you to think about its questions, spread out in three main themes : the need, the accessibility and the respect, in order to know if your project is truly a low-tech.
