

Translations:Poelito - Poêle de masse semi-démontable/266/en-gb

- Pour on 5cl of methylated spirits
- Light and quickly put the stopper back in.
- Light the fire in the ash tray
- Put the two lids half back on (on the feed pipe and the ash tray). Draughts which are produced by burning methylated spirits provide a fast and practical way to light the fire every time.
- If smoke escapes from the top, close the feed-pipe lid right down and reduce the ashtray opening.
