For installation, i recommend using diepti. It is interesting in particular for it is lightweight for single board computers, but also because the automatic installation of free software
with a relatively "user friendly" menu. We can mention among all the installable software at boot (https://dietpi.com/dietpi-software.html) domotic apps, interesting to save energy based on weather, but also tor relay to contribute to the relatively anonymous tor network, interesting for any "eco-terrorist" we are.
