

Translations:Shampooing sec/12/en

- Place one or a mixture of the basic powders listed above in your small container.
- If you need to adapt the colour, mix with one or more spices to obtain the desired colour.
- Place in the final container

 Optional: some people add essential oils. This is not necessary for preservation or hair care. Dry shampoos can be used to tide hair over or replace a few shampoos (to space out the washes) but are not a treatment in themselves. The smell is not essential either (especially if you adapt the colour)
