

Translations:Four solaire (cuisneur type boîte)/52/en

Explanation: The cadre is formed by 3 layers, it will coat the glass and maintain it. A first layer (panel 1, 2, 3 and 4) will form the inside cadre. Above we put the glass that should enter by 1,5cm. To avoid that the glass goes out and that it is well maintained, we add a layer of the same thickness and dimensions of panels 1, 2, 3 and 4 minus the 1,5cm taken by the glass. Then, we cover the panels 1', 2', 3' and 4'. This last layer is putted alongside, thereby, the aire will have more difficulties to penetrate.
