

Translations:Four solaire (cuisneur type boîte)/89/en

- Use dark containers, or painted in black.
- To capture the maximum of rays, directed correctly the solar oven to the sun. It is enough to redirect it once every hour in a manner to have the shadow of the oven directly on its back.
- To lose the less of heat as possible, avoid to open too often the oven during the cooking process. The best is to put all of the necessary ingredients at the beginning.
