

Translations:Poelito - Poêle de masse semi-démontable/129/en-gb

This tutorial has been produced by David Mercereau. This is a transcript of work carried out by Vital BIES, who are at the forefront of the idea behind the design of the Poelito and authors of the manual : <https://drive.google.com/file/d/1SDJ3YHpDVMU-OoX5gND9xs4qdx8HZaNJ/view>. We would like to thank them for the work they have done for our community. Only the construction and operating instructions are included in this tutorial. Additional options are covered in the Vital manual which include the doors providing access for cleaning and adding extra features such as heated seating or a water heater. We will also not be covering the openings from which the sand is removed as this will add to the complexity of building it. The sand can be removed at any time from the top of the stove. This English translation has been possible thanks to the PerMondo project: Free translation of website and documents for non-profit organisations. A project managed by Mondo Agit. Translator: Gill Barringer. Whilst great efforts have been made to ensure the quality of this translation, the translator makes no guarantees and will accept no liability for any claims made against her in the event of any misinterpretation, errors or omissions thereof.
