

Translations:Poelito - Poêle de masse semi-démontable/229/en-gb

Caution:: Avoid making it kidney bean shaped as over time it will become warped. As it continuously heats up and cools down, the sand will become compact and will put a lot of pressure on the metal part which may result in the bell chamber getting squashed and going out of shape if it is not an oval.

- Position the bell chamber around the smoke outlet and the heat riser holes.
