

Translations:Poelito - Poêle de masse semi-démontable/257/en-gb

Wood must be bone-dry. If not, the stove will not heat up properly and will get clogged up. You need 2 types of fuel:

- Fire-lighting wood: this is small thin bits of wood about 10 to 20cm long and is a maximum of 4 to 5 cm thick. Ideally this should be softwood as it is easy to catch fire.
